Diode laser technology for prophylaxis procedures

# KEEP YOUR ORAL HEALTH!

Medency is constantly focused on developing and designing diode laser systems for the dental and medical field to assist the specialist in increasing the performance and reliability of the studio.

Primo Lite is an innovative laser device designed by Medency Company for dental prophylaxis procedures.

Nowadays the importance of the oral hygiene and preventive care is confirmed by the increase of diseases and symptoms which, if not treated properly, could lead to different problematic conditions and the consequent need for dental surgery.

Primo Lite is developed to support the dental assistant and hygienist to provide the best dental health care to the patients.

Great value for your job and your practice.

- Preventive prophylaxis procedure
- High-power bacteria reduction
- dental cosmetic pre-set protocols
- attractive and modern design
- wide touch screen and large buttons
- Direct Power Control from the main screen
- Extremely intuitive software
- no more invasive surgical procedures
- no more pain or feeling of discomfort
- Flexible fiber, optical tips and versatile accessories
- Sleek autoclave handpiece
